

AppliedSensor  
founded

Development of air intake sensors for automotive cabin air quality control

Development of hydrogen gas sensors

Opel integrates H2 sensors on Equinox platform

Air quality sensors commercialized for bathrooms and kitchens

Joined with Texas Instruments to explore automotive gas sensing applications

Cover story

BMW integrates H2 sensors on Hydrogen 7

Occupancy sensors commercialized for building energy control

Consumer products launched for household odor control

**We've been at the forefront of gas sensor technology since the early 1980's. With this much experience under our belts, we can develop the best solution for your sensing needs quickly and efficiently.**
